

Features

- ★ Small structure
- ★ Intelligent control system
- ★ Efficient welding nozzle
- ★ Advanced belt combined with pressure roller system
- ★ Accurate positioning system
- ★ Special lifter equipped

Specifications

Model	ES - 002A
Welding Speed	1-12 M/MIN
Seam Width	20/30/40MM
Net Weight	15KG
Gross Weight	20KG
Packing Size	570*380*320MM

Small Structure

Small, light and easy to handle

Special Lifter

It facilitates the move of the machine, and it's easy to change its direction in operation

Intelligent Control System

Intelligent control system for easy operation

Accurate Positioning System

It ensures walking straightly without deviation by adopting guidance positioning wheels(or laser)

Efficient Welding Nozzle

20mm/30mm/40mm welding nozzle available

Advanced Belt Combined with Pressure Roller System

Belt and pressure rollers can be transformed that balances the pressure and stable working, which keeps perfect welding seam
